

Other Businesses

Our Environmental Solutions and Backlights businesses experienced a significant decline in sales for the year, mainly due to major changes in the business environment. We reallocated resources to new growth fields within these businesses, rebuilding our earnings structure. While the business environment is expected to remain challenging throughout fiscal 2016, we will continue to reform our business structure for growth and profit.

Review of Operations

Environmental Solutions Business

Hybrid Storage System for Solar Power

- Fiscal 2015: Slack demand in the solar power generation market led to a significant decrease in revenues.
- Fiscal 2016: We forecast higher revenues driven by demand for both existing products and new systems that integrate storage batteries.

Backlights Business

LCD Backlights

- Fiscal 2015: Decrease in demand in the Chinese smartphone market resulted in sharply lower revenues.
- Fiscal 2016: Despite slowing growth in the smartphone market, we forecast higher revenues as we capture demand by responding to changes in customer needs.

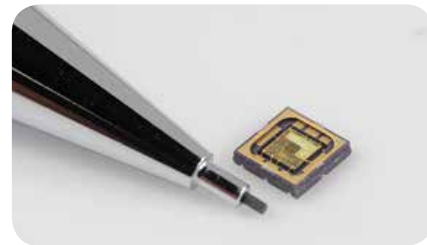

Electronic Systems and Equipment Business

Uninterruptible Power Supply Units

- Fiscal 2015: Higher revenues due to strong demand for uninterruptible power supply units and contract development and production services for electronic devices.
- Fiscal 2016: We forecast higher revenues as we expand our lineup of uninterruptible power supply units.

Micro Devices Business

MEMS Pressure Sensors

- Fiscal 2015: Decrease in demand for smartphone microphones resulted in lower revenues.
- Fiscal 2016: We forecast revenue growth due to expected demand for smartphone microphones and absolute pressure sensors.
