Matters relating to independent directors and Audit & Supervisory Board Members

The Company’s Policy Regarding the Independence of Outside Directors and Audit & Supervisory Board Members (Independent)

• In addition to the requirements of Japan’s Companies Act, the Company has formulated its own ‘Independence Requirements for Outside Directors and Audit & Supervisory Board Members’ (Note) and as we select all outside executives using these requirements as our standard, we judge them to be sufficiently independent, and register all of our outside executives as ‘independent directors and Audit & Supervisory Board Members.’

• When deciding on our ‘Independence Requirements for Outside Directors and Audit & Supervisory Board Members,’ we first consult with our Corporate Governance Committee (which is composed of outside executives and non-executive inside directors) and confirm that these requirements are appropriate as independence criteria for outside executives before they are deliberated on and resolved by Board of Directors.

   framework)

1. The current corporate governance system
Note: For details regarding the Company’s corporate governance system and initiatives
intended to enhance corporate governance, please refer to the OMRON Corporate Governance Policies.

   Gender Composition of Directors, Audit & Supervisory Board Members and Executive
   Officers
   • As of June 22, 2023, Board of Directors consists of eight members including one female
     Director.
   • The Company is considering an increase in diversity for the composition of Directors, Audit
     & Supervisory Board Members and Executive Officers in order to promote growth at the
     global level, enhance competitive strength, and respond to significant changes in the business
     environment.

2. Efforts toward Enhancing the Functions of Audit & Supervisory Board

   Audit & Supervisory Board System
Please refer to “6. Systems to Ensure Effectiveness of Audit Performed by Audit &
Supervisory Board Members”

   Regarding the Selection of Audit & Supervisory Board Members with Knowledge of
   Finance and Accounting
   • Mr. Hideyo Uchiyama, an Audit & Supervisory Board Member (Independent), has years of
     working experience as a certified public accountant in an auditing firm and considerable
     knowledge regarding finance and accounting.
Regarding the Selection of Audit & Supervisory Board Members (Independent) with a High Degree of Independence
Please refer to the Relationship with the Company (2) section on page 10 and “Matters relating to independent officers” in the Independent Officers section for more information.

3. Limited liability agreements
The Company has established a provision in its Articles of Incorporation regarding the limited liability agreements the Company enters into with its Outside Directors and Audit & Supervisory Board Members (Independent) with the approval of the shareholders, in order to ensure that these officers can adequately fulfill their duties and responsibilities. Accordingly, the Company has entered into limited liability agreements with Mr. Takehiro Kamigama, Ms. Izumi Kobayashi, Mr. Yoshihisa Suzuki, Mr. Hideyo Uchiyama, and Mr. Tadashi Kunihiro, under which each of these officers’ liability shall be limited to JPY 10 million or to the minimum amount of liability prescribed in Article 425-1 of the Companies Act, whichever is higher.
3. Reasons for OMRON’s Selection of its Current Corporate Governance System

The Company has chosen to adopt the organizational structure of a “Company with Audit & Supervisory Board.”

Board of Directors strives toward sustained improvements in the OMRON’s Group corporate value by exercising oversight functions over the overall management through the election of Directors, Audit & Supervisory Board Members and Executive Officers; the determination of compensation for Directors and Executive Officers; and making important operational decisions.

Audit & Supervisory Board and the Audit Supervisory Board Members work to secure the integrity of the OMRON Group and the sustained improvement of corporate value by conducting audits on legality and appropriateness of Directors’ duties, and the fulfillment of Board of Directors’ oversight obligations. In addition, each Audit & Supervisory Board Member can exercise his/her authority on his/her own as a single-person organ in which the power of final decision-making is given to one person. This allows them to play a crucial role in strengthening internal controls.

Furthermore, to enhance the oversight functions of Board of Directors, four voluntary advisory committees are attached to Board of Directors. CEO Selection Advisory Committee, Personnel Advisory Committee and Compensation Advisory Committee are chaired by an independent outside director, and the majority of each committee should be composed of independent outside director. The President & CEO does not belong to any of these committees. CEO Selection Advisory Committee, in particular, is dedicated to the deliberation and nomination of candidates for CEO, which is the top-priority matter in management oversight. In addition, the Corporate Governance Committee, established for the purpose of enhancing corporate governance, is to be chaired by an independent outside director, and its members to consist of independent outside directors, independent Audit & Supervisory Board Members, and non-executive inside directors. Through these unique initiatives, the Company has established and adopted a system that enhances the transparency and objectivity of management’s decision-making process.

By incorporating the best aspects of the corporate governance system of a so-called “Company with Committees (Nomination, etc.)” in this way, we have created the kind of hybrid corporate governance structure that we feel is most appropriate for OMRON as a Company with Audit & Supervisory Board.

3. Measures for Respecting the Position of Stakeholders

| Rules for Respecting the Position of Stakeholders through Internal Regulations, etc. | Supplemental Remarks |
| "Management Philosophy” is defined as follows. This is an important philosophy when we practice “The OMRON Principles” through our business and our commitment to all stakeholders. “We believe a business should create value for society through its key practices. We are committed to sustainably increasing our long-term value by putting Our Mission and Values into practice.” |
| ・ We uphold a long-term vision in our business practices to create solutions to society’s needs |
| ・ We operate as a truly global company through our fair and transparent management practices |
| ・ We cultivate strong relationships with all of our stakeholders through responsible engagement |

| Implementation of environmental activities, CSR activities, etc. | Material Sustainability Issues (Materiality) |
| In April 2022, OMRON started its Long-Term Vision, Shaping the Future 2030 (SF2030) - Innovation Driven by Social Needs through Automation to Empower People. Under SF2030, our aim is to maximize corporate value by creating social value and economic value through business. To achieve this vision, we identified five material sustainability issues, setting related medium- and long-term goals. Five Material Sustainability Issues (Materialities): |
| 1) Resolving Social Issues through Our Business |
| 2) Maximizing the Capability to Innovate Driven by Social Needs |
| 3) Generating Diverse Talent Taking on the Challenge of Value Creation |
| 4) Achieving Decarbonization and Lower Environmental Impact |
| 5) Respecting Human Rights in the Value Chain |
| In accordance with our corporate governance policy, the board |
of directors makes resolutions on all material sustainability issues and medium- and long-term targets, monitoring and supervising progress.

- OMRON Corporate Governance Policies
- Medium-to-Long-Term Goals of Material Sustainability Issues (Materialities)

**OMRON Environmental Policy and OMRON Human Rights Policy**

On March 1, 2022, prior to the start of our SF2030 long-term vision, the board of directors approved and established the OMRON Environmental Policy and the OMRON Human Rights Policy. These policies are important guidelines for solving sustainability issues and achieving our goals while keeping abreast of the future demands and expectations of the international community. Based on these two policies, OMRON strives to enhance corporate value by contributing to the creation of sustainable societies through efforts to decarbonize and reduce environmental impact throughout the value chain. We also conduct human rights due diligence in line with international standards and establish human rights remediation mechanisms.

- OMRON Environmental Policy
- OMRON Human Rights Policy

**Achieving Decarbonization and Lower Environmental Impact**

In July 2018, OMRON established OMRON Carbon Zero, aiming to eliminate Scope 1 and 2*1 greenhouse gas emissions by the year 2050 toward the creation of carbon-neutral societies. Under SF2030, we are reducing greenhouse gas emissions, aiming for a 65% reduction in Scope 1 and 2 emissions and an 18% reduction in Scope 3 Category 11*2 emissions by 2030 (all compared to fiscal 2016 levels). These targets were recognized as science-based targets, and in May 2022, we obtained accreditation from the international initiative SBTi*3.

Under the SF 1st Stage, our medium-term management plan through 2024, we are implementing the following initiatives:

- Reduce internal GHG emissions (Scope 1 and 2): 53% cut vs. FY2016
- Achieve Carbon Zero at all 76 sites in Japan (Scope 2)
- Implement energy-saving designs for new products (Scope 3)

In February 2019, we expressed our endorsement of the TCFD
(Task Force on Climate-related Financial Disclosures). In FY2021, we engaged in a company-wide approach using the TCFD framework, conducting scenario analyses of our major businesses. In FY2022, we began disclosing information on the impact of climate change on our business in annual securities reports, integrated reports, etc., in accordance with the TCFD framework. We continue to review the financial impact of climate change on business opportunities and risks.

In November 2022, we became the first Japanese manufacturer to join the EP100*. At that time, we declared our goal of doubling (compared with 2016 levels) our energy productivity, or the ratio of sales per gigawatt-hour (GWh), by 2040 at all production centers in our Industrial Automation Business and Healthcare Business. Currently, our Industrial Automation Business and Healthcare Business are working on a project together at our Matsusaka factory in Japan for blood pressure monitors and thermometers. The two businesses are creating a system to double production while reducing energy consumption. We contribute to the decarbonization of the manufacturing industry and society by providing expertise gained through our efforts, not only within our own organization, but also across the world.

*1 Scope 1 and 2: Greenhouse gases emitted directly or indirectly from the company's own operations.
*2 Scope 3 Category 11: Scope 3 is greenhouse gas emissions from the company’s own value chain. Scope 3 Category 11 is emissions from the use of products, services, etc., manufactured and sold by the company.
*3 Science Based Targets Initiative (SBTi): An international initiative that encourages medium- and long-term greenhouse gas reduction targets based on scientific evidence.
*4 EP100: Abbreviation for 100% Energy Productivity. An international corporate initiative organized by The Climate Group, an international environmental NPO headquartered in the U.K. Under EP100, participating companies aim to double energy productivity in their business activities (e.g., improve energy efficiency by 50%).

Respecting Human Rights in the Value Chain

In line with the UN Guiding Principles on Business and Human Rights, OMRON will aim by 2030 for the state of exerting our influence for the respect of human rights for workers not only at OMRON, but also in the value chain, and establish a culture and system that does not permit or cause human rights violations.

Under SF 1st Stage, our medium-term management plan, we will communicate and inculcate the newly established OMRON Human Rights Policy to our employees worldwide and conduct human rights due diligence and a human rights redress mechanism in accordance with the UNGP with the aim
of establishing a global human rights governance system. Specifically, we are engaged in the following initiatives:

・Identify potential human rights issues at OMRON group through human rights impact assessments
・Conduct self-assessments of the risk of human rights violations at our production sites and implement third-party audits
・Require suppliers to understand and implement the OMRON Sustainable Procurement Guidelines, which include considerations of human rights and the environment, and to conduct self-assessments of the risk of human rights violations
・Establish ethical policies to ensure AI, robotics, IoT, and other technologies used in our products and services do not lead to human rights violations
・Establish a contact point via the Compliance Hotline (internal reporting system) to receive complaints of human rights violations, not only from our employees, but also from our suppliers

Establishment of a Dedicated Sustainability Department and Sustainability Committee

We declare that the OMRON board of directors is responsible for monitoring and oversight functions with respect to our efforts to address sustainability materialities. To ensure the effectiveness of these functions, we established the Sustainability Office under the board of directors to promote sustainability activities throughout the OMRON Group, including OMRON Corporation. In addition, we formed the Sustainability Committee as an executive committee to identify various social demands and reflect said demands in the goals and plans under the five material sustainability issues.

<Health Management>

With the belief that the health of individual employees is fundamental to our business, OMRON issued "OMRON Health Management Declaration" in 2017, according to which top managers are taking the lead in promoting health and productivity.

All Group Companies in Japan establish an action agenda for “Exercise, Sleep, Mental Health, Diet, and Stop Smoking” which are selected as five key factors as “Boost 5”, leading to the concentration of work and wellness of life, and programs to achieve each index have been implemented. Visualizing health conditions and the support of conducting seminars or having advice from occupational health physicians and nurses are carried out, in order to facilitate the employees’ awareness and habituation.

By continuously taking Boost 5 approaches throughout the year, with the aim of reducing future health risks, we develop mentally and physically tough talents, aiming to create a workplace with full of smile. We were recognized for these efforts and selected as brands of the Health & Productivity Stock Selection under The Ministry of Economy, Trade and Industry and the Tokyo Stock Exchange for the fifth consecutive years (2019~2023).

(1) In order to meet the needs of our stockholders and other stakeholders for information disclosure, we disclose information according to even stricter standards than the requirements of Japan’s Financial Instruments and Exchange Act and the Timely Disclosure Rules of the Tokyo Stock Exchange.
(2) With regard to qualitative information about which individual decisions regarding the need for disclosure are required, a meeting of the Information Disclosure Execution Committee (hereinafter referred to as the “Execution Committee”) will be promptly convened to deliberate on whether the information ought to be disclosed and if so, what details require disclosure.

(3) In order to ensure fairness to all stakeholders when disclosing important facts, in addition to promptly disclosing the information to the Tokyo Stock Exchange, we will also release the information to at least two different media outlets.

2. Internal system for timely disclosure

2.1 Timely disclosure implementation system

OMRON has established the Execution Committee for timely disclosure of information. The Execution Committee determines whether any decision made or incident occurred in OMRON Group corresponds to TSE’s timely disclosure rules and/or OMRON’s own disclosure standards. The matters that the Execution Committee decides to disclose are reported to the person in charge of information management, who then instructs the Investor Relations department to timely disclose these on TSE’s Timely Disclosure Network (TDnet). In order for the Execution Committee to obtain important information, any important information is to be reported according to the following procedures (1) and (2).

(1) Departments handling information in Head Office and business divisions determine whether, according to the disclosure rules, incidents that occurred within their own division are to be disclosed, and then report these matters, as well as matters about which they are unable to make a decision, to the Execution Committee for deliberation.

(2) Board of Directors Office and the Executive Council Office notify the Execution Committee of any important matters that is submitted for deliberation to Board of Directors and the Executive Council.

2.2 Internal timely disclosure system

OMRON positions disclosure of information as an important issue to our drive for highly transparent management, and has set up the Execution Committee, which directly reports to CEO, to promote disclosure of information. The Execution Committee is tasked with ensuring the accuracy, timeliness and comprehensiveness of all of OMRON Group’s information disclosure and carrying out information disclosure in a proactive manner in accordance with OMRON Group’s disclosure standards.
